

A diagram illustrating the addition of two vectors, $a\alpha$ and $b\beta$, resulting in a zero vector $c=0$.

The diagram shows a horizontal line with a central point. To the left of this point is a double-headed arrow pointing left, labeled $a\alpha$. To the right of this point is a double-headed arrow pointing right, labeled $b\beta$. A plus sign $+$ is positioned above the central point. A vertical line segment extends downwards from the central point to the text $c=0$.
