

$$=$$

Diagram illustrating the decomposition of the vertex into two terms, separated by an equals sign (=). Each term consists of a horizontal line with arrows pointing outwards from both ends. The top term has incoming labels $j_1 \tilde{m}_1$ and $j_2 \tilde{m}_2$ on the left, and outgoing labels $j_1 m_1$ and $j_2 m_2$ on the right. A plus sign (+) is located between the two horizontal lines. Between the horizontal lines, there are two vertical stacks of five squares each. The left stack is labeled R_3 to its left, and the right stack is labeled R_2 to its right. Above the right stack is a label R_1 . Plus signs (+) are also present between the horizontal lines and the stacks of squares.
